

EMANUEL ETCHEVERRY

Data Analyst / Business Analyst

(249) 437-6120 | etcheverryemanuel0@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Tandil, Buenos Aires, Argentina

PROFESSIONAL SUMMARY

Data Analyst with a background in Technology Management (UNICEN) and IBM Data Analyst Professional Certification. Specialized in Python, SQL, and Power BI for exploratory analysis, process automation, and decision-oriented dashboard development. Proven ability to deliver measurable impact: reduced a critical 3-hour manual workflow to under 1 minute through end-to-end pipeline design.

EXPERIENCE

Process Automation Lead • Castellá & Dorronsoro — Las Flores, Buenos Aires (*Feb 2026 – Apr 2026*)

- Led end-to-end development of a Python application to automate retirement benefit calculations, replacing a 100% manual process.
- Built data cleaning and preprocessing pipelines with Pandas; designed combinatorial optimization algorithms weighted by seniority and education branch.
- Generated automated PDF reports with Matplotlib visualizations. Reduced analysis time per case from 3+ hours to under 1 minute, eliminating manual calculation errors in a legally critical workflow.

Administrative Volunteer • Banco de Alimentos de Tandil — Tandil, Buenos Aires (*Nov 2024 – Dec 2024*)

- Performed general administrative tasks: cash reconciliation, order management, documentation control, and inventory tracking.

FEATURED PROJECTS

Job Market EDA & Data Cleaning • SQL · Power BI (*Jan 2026*)

- Cleaned and explored a Glassdoor job listings dataset in MySQL: deduplication via Window Functions, null handling, and data standardization. Delivered insights on Data Analytics and Data Science roles through an interactive Power BI dashboard with DAX metrics.

Demographic Pressure & School Coverage in Buenos Aires • Python · Power BI · DAX (*Jul 2025*)

- Integrated official government datasets to assess demographic impact on school infrastructure across municipalities. Built a relational data model, defined KPIs in DAX, and delivered an interactive Power BI dashboard to support evidence-based decision-making.

Language Learning Pipeline Automation • Python · APIs (*Feb 2026*)

- Developed a script to automate vocabulary conversion for language learning. Used Pandas for text preprocessing and integrated external APIs for EN–ES translation and definition extraction into a structured dataset.

TECHNICAL SKILLS

Python: Pandas, Matplotlib, NumPy, BeautifulSoup4, Requests, OS, REST APIs

Power BI: DAX, Power Query, Star Schema, API integration

SQL (MySQL): CTEs, Stored Procedures, Joins, Window Functions

Excel: Pivot Tables, Pivot Charts, XLOOKUP, VBA

Other: Snowflake, dbt, Git

EDUCATION & CERTIFICATIONS

- B.S. in Technology Management – UNICEN, Tandil, Buenos Aires (2021–2026)
- IBM Data Analyst Professional Certificate – IBM (2026)
- EF SET English Certificate – 74/100 · C2 Proficient (2026)
